The field of technological engineering is one of the most rapidly changing. Having to constantly update itself in order to combine with the incessant evolutions of software and ways of dealing with the world, Doussou Formation has thought of engineers by offering a tailor-made training formula. We provide a variety of interesting and relevant training for engineers. Our teaching team is made up of experts in their field and our approach favors practice as well as small groups. This, in order to encourage interactions conducive to the creation of formative and lasting experiences.

By completing your training with Doussou Formation, you will put your skills into practice, you will have privileged access to your trainer, and we will follow up with you in order to constantly offer the best training.

For the 30 hours of compulsory continuing education requested by the Order of Engineers, we are present. Let us give you the tools to be up to date with technological and methodological advances. At Doussou, you will certainly find training that meets your needs.
